TOOLS

PROFILE

A passionate and hard-working designer and developer with a uniquely diverse skillset and a willingness to learn. Just some of the ways I can serve you include:

- ❯ Full-stack web development using JavaScript, HTML, CSS, Python, SQL, and numerous libraries/frameworks
- ❯ Desktop application and embedded system development using C, C++, Java, and Python
- ❯ Graphic design and digital editing using Adobe CC

WORK HISTORY

Digital Operations Associate, Feb. 2018 - Jan. 2019

While working for the Firearms Policy Coalition, I created web pages, emails, and social media posts, and I also designed graphics for those and other purposes.

Data Center Assistant, Jul. 2017 - Jan. 2018

While working as a student assistant at Sacramento State, I not only repaired, configured, installed, and removed various data center equipment, but also wrote technical documentation, handled data backups, and performed general upkeep.

EDUCATION

Sacramento State University, 2015 - 2017

B.S. in Computer Science; notable coursework included parallel programming with GPUs, data structures and algorithm analysis, object-oriented programming, database management systems, and advanced computer graphics.

Sierra College, 2011 - 2015

A.S. in Computer Science; notable coursework included Java programming, C/C++ programming, graphic design, advanced mathematics, discrete structures, game design/development, and web design/development.
